

# Section Information

Vincent Liang

August 25, 2015

## **MATH 1B**

### **Discussion section 214**

MWF 2:00 - 3:00 Pm, 121 LATIMER

GSI: RuoChen Vincent Liang

Email: liangrc2012@math.berkeley.edu

Office Hours: TBA

## **General**

The discussion sections for this course are designed as complements to the lectures but NOT additional lectures. This means that I will **NOT** cover **NEW** materials other than those done by Vojta.

Coming to office hours and sending me emails are also useful ways for you to receive more individualized support for problems you are finding difficult.

## **Enrollment**

- Students on the wait list should look for an open section. If you cannot find one to fit your schedule, you should go talk with Thomas Brown in 965 Evans. Students with questions about Concurrent Enrollment can also ask Thomas Brown.
- You **MUST** attend the section for which you are registered. If you are enrolled and wish to switch sections then you can do so yourself on TeleBears. However, you cannot switch into a full section and since we got hundreds of students, switching sections is discouraged.

## **Homework**

Homeworks will have two components, the **WEBWORK** part and the written part. The **WEBWORK** part will all be done on the web and automatically graded while the written part is **NOT REQUIRED** to be handed in.

The **WEBWORK** part will contribute to your final course grade while the written part won't, but I still strongly recommend you **DO** it since it is helpful. Answers will be posted on the instructor's website.

## **Quizzes**

There will be weekly quizzes from the second week(next week), given on **WEDNESDAY**. Each quiz consists of three questions with increasing difficulty and you will have **15 Minutes** to do it. The two lowest quiz scores will be dropped and there will be no make up quizzes.

## **Grading**

Your grades consist of four parts:

Weekly homework and quizzes: 25%, Mid Term I: 10%, Mid Term II: 20%, Final: 45%.
